

# The Budding Gardener

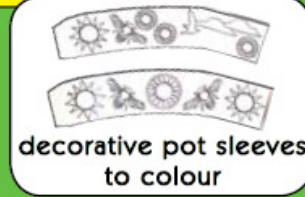

the growing kit  
for kids

the **perfect** little introduction kit to gardening!  
everything included in just **one box!**

the box turns  
into a  
mini garden!

what's inside...

The Budding Gardener™ combines modern online educational applications with the timelessness of outdoor fun. Allowing kids to "learn while they play", The Budding Gardener™ bridges the generation gap, allowing grandparents and parents alike to spend quality bonding hours with their young gardeners-to-be.

In addition to being a great introduction to gardening, The Budding Gardener™ also teaches kids the importance of environmental products. The Bio-pot and Bio-saucer are a 100% biodegradable alternative to plastic.

With product franchise growth planned, and ongoing web application development, The Budding Gardener™ promises to be a staple product in the Educational Toys category.

plus fun gardening activities and info on the  
kid-friendly interactive website!
