

NEW

ECO SEEDING TRAYS

USDA Certified Biodegradable ASTM 6400

Lifespan of approximately 14 weeks

Just Seed & Plant

Ideal for Perennial, Annuals and Urban Rooftop Gardens

Features of the PSM Biodegradable Materials

PSM[®] biodegradable material is a [biodegradable](#), [thermoplastic](#) resin. It is composed of [starch](#) combined with several other biodegradable materials. The starch is [modified](#) in order to obtain heat-resistant properties, making PSM one of few bio-plastics capable of withstanding high temperatures.

PSM[®] saves a large amount of petroleum resources by applying the natural polymer material as part of the raw materials. which are abundant and reproducible.

There is no waste water effluent gas or waste residue in the course of production; conformity to environmental specifications.

Featured Benefits of the ECO Seeding Trays

Trays perform as well as Plastic in Automated Greenhouse Environments

USDA Certified Biodegradable and Compostable

Trays will not absorb water

Just seed and plant

Lifespan when in use ranges from 12- 14 weeks in a greenhouse production environment

In dry warehouse environment shelf life tested to 3 years

Allows a grower to reduce the impact of plastic on our environment one pot at a time.

Great product for both commercial and retail consumption
